Free of charge software update for the Easy Brake Tool (EBT)

With TRW's EBT every garage is well prepared to work on the Electrical Parking Brake (EPB) in a safe and professional manner. The tool releases the caliper pistons and when the discs and/or brake pads have been replaced, it puts them back into their original position. Up to now, the software on the EBT covers the Audi A6 (from 2004) and the VW Passat (from 2005). A software update is also now available to cover the Audi A8 – for free! With the Audi A8 the lining thickness of new brake pads has to be stored in the ECU. This job can also be done with the tool. When necessary also the fault memory will be deleted.

Benefits of the Easy Brake Tool:

- Garages can offer a safe and professional service and gain new business
- Good value solution (no need for an expensive diagnostic unit)
- Multi-brand usage
- Can be updated easily
- Easy to use / low risk of malfunctions
- Robust, shock-resistant metal case

Get your free software update now for the Audi A8

Please get in contact with your specialised dealer to obtain the update for the Audi A8 (TRW's part number: YBS301). For further information please take a look at our Technical Newsletter (TN-09-2007-3).

This issue of TRW's product newsletter contains information on 64 range extensions belonging to our friction, hydraulic and suspension programmes.

Overview:

- 10 friction products
- 29 hydraulic products
 - 4 steering and suspension parts
- 21 steering gears and pumps

TRW Automotive Aftermarket

TRW Automotive Aftermarket is a leading provider of high quality replacement parts, service, diagnostics and technical support to both the independent aftermarket (IAM) and the vehicle manufacturer service (VMS) channels.

Combining the original equipment (OE) strengths of our market-leading braking programme and our steering and suspension range, the business leads Europe in chassis systems for the aftermarket.
