RACE-R PRO

10 years ago, our engineers designed the best racing helmet in the world.

They didn't know that Race-R Pro would still fly over its category 10 years later.

- The DNA of a pure racing helmet : the qualities of Race-R Pro are magnified in the extreme conditions of racing and validated by 200 world podiums.
- Aerodynamics and stability: Channels flow for exceptional air penetration and minimized "buffeting" effect, the helmet does not move, even at high speed.
- Support : Alveotec foam and 3D "Morpho" cheeks (GP / FIM versions) ensure comfort and balance.

Thanks to the feelings given by a helmet that offers the highest level of safety, the pilot can focus on his performance.

- Unmatched shock absorption to date: A unique combination of Carbon and Aramid fiber for a result that remains exceptional in 2020
- Resistance to compression and abrasion
- High resistance optical class 1 visor : No distortion

SKWAL 2

A roadster helmet which concept has been carefully thought out to combine the best of every world: its sharp look and LEDs integrated into the design of the vents will increase visibility.

Design

The soft lines of its design will meet the highest expectations.

The SKWAL 2 convinces 50 000 new users every year

Ergonomics

The top ventilation have been placed in an optimum position to ensure the best aerodynamics complemented by a distinctive rear spoiler inspired by our flagship Race R Pro. The sun visor on the side of the helmet is very easy to operate : all SHARK know-how gathered in this best-selling model... what else!

EVO-ES

Key Advantage:

In 2006, Shark's R&D department disturbed the codes of the modular helmet and created a new helmet DNA: the only true modular on the market, the EVO.

Safety

Inventors of the dual certification, our engineers pushed the boundaries of the helmet standard at the time to deliver the best of a full face combined with the best of a jet helmet.

Comfort

Perfectly balanced, both in the open and closed position, the Evo-ES opens up the possibility of real confort within a fundamental modularity.

UNECE 22-06

The future international helmet homologation

Schedule

January 2020

Validating the text of the new norm by United nations

January 2021

Possibility to homologate helmets under 2206 (not mandatory yet)

July 2022

22-06 is mandatory

(it is not possible to homologate a helmet under 2205 homologation anymore)

July 2023

Helmet manufacturers can't produce 2205 helmets anymore

January 2024

Selling 2205 helmets is forbidden (except if a specific country decides to keep 2205 valid)

2206 is a reinforced testing protocol over :

- Impact Test (linear)
- Chinbar impact test (S Point)
- Lateral test (rotational acceleration)
- Full Face / Jet double homologation
 - Visors
 - Sunvisors
